

Mobile Data Policy

Mobility has transformed the way we work. It has also introduced a broad range of risks for IT teams. Your employees have access to the world at their fingertips, and as they go mobile, so does your data. It is now crucial to ensure that your data does not fall into the wrong hands. At the same time, noncompliant or illicit conduct can expose your business to legal complications, while excessive data use for non-business purposes can damage both productivity and your budget. Wandera takes care of all these drawbacks and more, letting you take full advantage of the mobility revolution.

> Better together

Wandera has partnered with MobileIron to provide a full end-to-end mobility solution that provides the highest level of insights and analytics across mobile devices used in the enterprise. Combining MobileIron's Unified Endpoint Management (UEM) functionalities, such as device management and information protection, with Wandera's multi-level architecture, customers can apply intelligent policy to fully manage data usage and flag employee usage risks.

The joint solution supports iOS, and Samsung Android and deploying via MobileIron Core and MobileIron Cloud is quick and easy.

> Challenge

Organizations with a mobile workforce don't have visibility into how devices that access their corporate data are being used.

Mobile Data Policy offers:

- > Real-time insights and analytics on mobile risk
- > Content filtering by app or website
- > Prevents data loss through leaking apps and all forms of Shadow IT

Benefits:

- > Reduce data costs and make data usage more predictable
- > Boost productivity and reducing employer liability
- > Stay fully compliant with GDPR

Multi-level framework

Endpoint Application

Best-in-class detection

- > Manage endpoints
- > Analyze apps
- > Educate end users

In-Network Architecture

Cloud Gateway

Policy for corporate devices

- > Enforce usage policy
- > Filter access
- > Eliminate Shadow IT

Administrative Console

Enterprise management

- > Real-time insights
- > Alerts and notifications
- > Safeguard user privacy

Mobile Data Policy

Powerful policy controls to provide peace of mind

> Enforce acceptable use

Set intelligent web-filtering rules about which behaviors and sites/apps are considered acceptable, with the power to enforce them. Wandera helps you ensure usage is compliant, and reduces risk exposure from illegal or unacceptable use.

> Gain detailed end-user and admin insights

Our admin portal, RADAR, gives you insight into your mobile usage and brings real-time analytics to your organization - enabling you to make meaningful changes to your policies based on the trends you identify.

> Eliminate excessive data usage

Set intelligent rules for data usage (including streaming and roaming), ensuring that you are in control and that usage is appropriate, while avoiding unexpected overages.

- > Capping and blocking with alerts
- > Data savings
- > Roaming and tethering controls

> Fully customizable

Create policies that apply to different end user groups in different circumstances, and switch devices from one group to another with ease. You can even apply policies for different device types or geographies.

Use Cases

> Roaming Reduced

One of the world's leading management consulting firms deployed Wandera with MobileIron to help control their data usage. Consultants travel frequently, and this organization's data bill was millions of dollars every year. Wandera Mobile Data Policy for MobileIron now helps the firm set granular data caps when roaming, and blocks unnecessary file syncing over cellular networks.

Implementing Wandera let the firm stay within their mobile data plan, reducing roaming costs by 59%.

> Content Filtered

An enterprise oil company uses Wandera's Mobile Data Policy to enforce acceptable usage policies - anyone trying to access inappropriate content is blocked, and given information on why that content has been filtered. The solution is deployed seamlessly to the mobile fleet using MobileIron, with a 'zero-touch' approach.

Wandera blocks an average of 218 attempts to access restricted content per day for this organization.

For more information, get in touch with your MobileIron representative.

Wandera is a leading mobile security company, providing multi-level protection against cyber threats for users, endpoints, and corporate applications. Security teams worldwide rely on Wandera to eliminate threats and enhance user privacy.
