

# TOP 6 IT BENEFITS

OF INTEGRATING SPLUNK® SOFTWARE WITH MOBILEIRON CORE

## 1. Automate mobile intelligence.

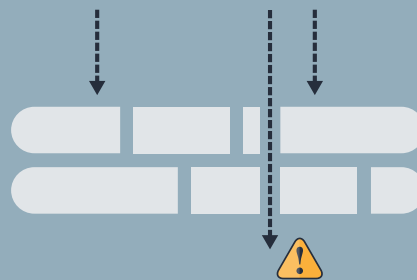

Forward system health information and mobile device data to Splunk, and then use the MobileIron App for Splunk Enterprise to visualize this data.

## 2. Visualize key mobile metrics.

View user and device characteristics and system health information.

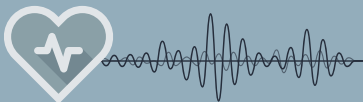

## 3. Identify potential mobile security risks.

By mapping relevant mobile device information to the Splunk Common Information Model (CIM), admins can correlate and pinpoint security gaps in VPN gateways, firewalls, and other services.

## 4. View current and historical data.

Track system health, corporate and regulatory compliance, mobile device compliance status, quarantined devices, historical trends, and more.

## 6. Map the geographic spread of all your mobile devices.

See all your devices around the world or zoom to street view for detailed device information.
